

ABSTRACT

A multistage propylene-based polymer including the following components (A) and (B): (A) 5 to 20 wt% of a propylene
5 homopolymer component or a copolymer component of propylene and an α -olefin with 2 to 8 carbon atoms having an intrinsic viscosity $[\eta]$ of more than 10 dL/g in tetralin at 135°C; and (B) 80 to 95 wt% of a propylene homopolymer component or a copolymer component of propylene and an α -olefin with 2 to 8
10 carbon atoms having an intrinsic viscosity $[\eta]$ of 0.5 to 3.0 dL/g in tetralin at 135°C.
